## Professional Summary:

Back-end developer with 2+ years of experience in building and maintaining scalable web applications using Laravel and PHP. Skilled in REST API development, authentication & authorization, clean code practices, and database management (MySQL). Strong background in front-end development with HTML, CSS, and JavaScript. Certified in Microsoft Office (Excel, Word, PowerPoint). Passionate about problem-solving, enhancing user experience, and delivering impactful digital solutions.

## Professional Experience:

### Intern Developer · Raiser Company

3-Month Internship – 2025

- Enhanced an existing project by improving dashboard filters for accurate data retrieval.
- Implemented new Blade features including WhatsApp and Facebook contact fields.
- Added Google Login authentication and user comments with performance ratings stored in the database.
- Improved UI/UX by making interfaces more responsive and user-friendly.

### Back-End Developer (Laravel Projects)

2023 – Present

- Developed and maintained back-end systems using PHP (Laravel) focusing on scalability and performance.
- Designed and implemented RESTful APIs to support front-end applications.
- Collaborated with team members to ensure clean architecture and best coding practices.

### Front-End Developer (Freelance Projects)

2022 – 2023

- Built responsive and accessible UIs using HTML, CSS, and JavaScript.
- Integrated front-end features with Laravel back-end applications.

- Ensured cross-browser compatibility and mobile responsiveness.

### **Data Analyst (Academic & Practical Work)**

2023 – 2024

- Conducted data analysis tasks for academic projects.
- Applied statistical and analytical techniques to extract insights from datasets.
- Utilized Excel and other tools to automate reporting and visualization.

### **Volunteer Developer · Blue Bits Team**

2022 – 2025

- Collaborated with students on technical projects within the Faculty of Informatics Engineering.
- Contributed to building software solutions and supporting team initiatives.

### **Volunteer Developer · Informa Team**

2021 – 2023

- Assisted in developing and organizing technical activities and projects.
- Supported workshops and knowledge-sharing sessions in the field of Informatics.

### **Volunteer · Scientific Society for Informatics**

2023 – 2024

- Engaged in community-driven technical initiatives.
- Contributed to promoting informatics awareness and education.

## **Education:**

University of Aleppo

Bachelor of Science in Informatics Engineering (Graduated)

Specialization: Software Engineering, with focus on web development and data analysis.

## **Technical Skills:**

- Programming Languages & Frameworks: PHP, Laravel, C#, C++
- Web Development: HTML, CSS, JavaScript, Blade Templates
- Database Management: MySQL (CRUD operations, relations, optimization)
- Office Tools: Excel (Advanced Certified), Word, PowerPoint
- Other Tools: Git, GitHub, Bitbucket, responsive design, clean code, problem-solving, research

## Languages:

- English: C2 (Proficient)

## Projects:

- **Event Reservation System (Laravel):** Developed a complete event booking platform with authentication and authorization, clean code, reservation management, and an admin dashboard. Technologies: Laravel, MySQL, Blade, Bootstrap. GitHub: <https://github.com/gharraahaddad>
- **Event Management System (Laravel):** Built an API with authentication, reservations, and notifications
- **Portfolio Website:** Personal portfolio to showcase projects and skills. Live Demo: <https://gharraahaddad.github.io/protfolio/>
- **Data Analysis Reports:** Academic projects applying statistical techniques to datasets.

## Interests:

- Software Engineering & Web Development
- Data Analysis & Artificial Intelligence
- Improving User Experience & Accessibility
- Community Volunteering in Informatics
